Coincraft

WE WANT YOUR NOTES!

Coincraft desperately needs banknotes and is willing to pay special prices for British and world notes. Maybe you should think about selling your notes; it could be well worth your while!

White notes, Bank of England notes, Treasury notes, Provincial notes; if you have them, we want them! With over 4,000 banknote buyers on our mailing list we are always in need of more notes. Perhaps you can help us and make yourself some money at the same time!

English notes, Scottish notes and Irish notes are especially in demand at this moment and that is reflected in our excellent prices. Single notes, original blocks of notes, hoards or collections; we are happy to buy notes in any quantity. We also want world notes; either as single important notes, whole collections or accumulations.

We paid over £240,000 when we bought the famous lot of British military notes at auction. If you want to sell your notes without any hassle, at an excellent price and for immediate on the spot payment, then please contact Claire Lobel.

Call in person at either of our two shops at 44 & 45 Great Russell Street, just across from the British Museum. Open Monday to Friday 9.30 to 5.00 and Saturday from 10.00 till 2.30.

Friendly, personal service and an interesting display of coins, banknotes, medallions, ancient coins and antiquities, to tempt and delight you.

Buy by post through Britain's only coin newspaper, The Phoenix, published every three weeks. It contains 24 tabloid sized pages of special offers and rare items, many not available anywhere else.

You can't buy a subscription, but you can get a complimentary copy free, just for the asking.

On the Internet Our website, **www.coincraft.com** is available 24 hours a day. There are many interesting features including a comprehensive numismatic glossary. Keep looking, more is being added every day.

We always need to buy Coincraft needs to buy: single items to entire collections, dealers inventories, hoards, accumulations, you name it and we will make you an offer. Over 90% of our offers are accepted. Sell where the dealers sell.

Introduction

Welcome to the 15th edition of Collectors' Banknotes. This is the first colour edition, and the images have been reproduced at the highest possible resolution.

I admit to being primarily a coin dealer with limited involvement with banknotes, and the whole task of producing a banknote price guide was incredibly daunting at first. The last edition sold well but for this new edition, to ensure everything was as accurate as possible, I have called upon the help of Pam West, who is one of the countries leading banknote experts. Pam has been kind enough to update all the prices and to donate a few images of scarcer notes.

Pam has corrected a few minor errors, and has also added data - mainly concerning note serial number ranges - in order to make this book accurate according to current information and research. The market over the last couple of years has been strong and many notes are priced much higher in this new edition than they were in the last.

Pam and I both hope that this book provides you with accurate and complete information!

Chris Henry Perkins and Pam West
www.predecimal.com / www.britishnotes.com
December 2007

The Layout of this catalogue

As in previous editions, the Treasury notes are dealt with first in spite of the fact that the Bank of England issued notes appeared some two hundred years earlier. Treasury notes were issued for a specific length of time, and because they have an exact start and end point, they are complete. Bank of England notes are still being produced and it is logical therefore to have them after the Treasury notes so that they can be added to as new notes are issued.

Collectors' Banknotes 2008 is therefore laid out in three sections:

The first section covers Treasury Notes printed between 1914 - 1927 including the unofficial Shilling, Half Crown and Five Shillings notes and the Dardanelles campaign overprint notes.

The second section covers Bank of England Notes 1694 - 1928, and includes approximate values for the earlier very rare banknotes where information is available.

The third section covers the modern Bank of England issues, from 1928 - date. This section is naturally fully updated with the new banknote issues each year.

The Layout of the Listings

The listings throughout the book are arranged in six or seven columns. The first column is always the reference number, this number is unique to this book and would have remained unchanged since the first edition (unless stated). New issues are given new reference numbers. The second column is for the date of the Note and the third column will contain the name of the signatory and other relevant variety information. Columns four to seven contain the values of the notes in varying states of preservation (see the introduction to grading on page 4).

Serial Prefix Combinations

At the beginning of most bank note ranges, the serial prefix format is specified along the following guidelines:

LNN = Letter-Number-Number e.g A12
NNL = Number-Number-Letter e.g 12A
LLNN = Letter-Letter-Number-Number e.g AB12
LNNL = Letter-Number-Number-Letter e.g A12B

L/N = Letter over Number e.g $\frac{A}{1}$

L2/N = Letter and small indicated Number over another Number e.g $\frac{L2}{1}$

Other combinations, should they occur will hopefully be quite obvious.

Some note types have either a dot or a dash under the 'No'. Something like: N º or N º

A RADAR number reads the same backwards as it does fowards, e.g 796697.

An Introduction to Bank Note Grading

Grading of Banknotes often comes down to a matter of personal opinion and the ability to grade notes to a degree of accuracy often takes years of experience with different banknote types. Just as with coins, the most common way of grading banknotes is to assign a grade from a range of: Poor, Fair, Fine, Very Fine, Extremely Fine and Uncirculated. Notes that fall between the 'whole' grades are often referred to as 'GVF' (Good Very Fine), 'NEF' (Near Extremely Fine), or even 'AEF' (About Extremely Fine). Only perfect notes in as new condition should be labelled 'Uncirculated'.

For novice collectors a penalty point system has been devised to help with grading. Please note that not all aspects of banknote condition are covered and often the best way to learn how to grade with any degree of accuracy is to befriend an experienced collector or dealer.

Assuming a perfect note is 100%, start at 100 and deduct points based on the following:

Holes	Each pin hole	5 Points
	Larger holes	10+ Points
Edges	Fluffed or uncrisp portions	5 Points
	Tears short of design	10 Points
	Tears reaching into design	20 Points
Folds	Very minor 'Cashiers bend'	2 Points
	Discernable but unsharp fold	5 Points
	Sharp, distinct crease	10 Points
	Several folds (squeezed into small pocket)	20 Points
Dirt/Wear	Area of just noticable discolouration	5 Points
	Grubbiness - Cashiers marks	10 Points
	Partial illegibility from dirt or wear	20 Points

For anything else that makes you less than happy and has not been penalised above deduct: 1 - 5 Points

Range: Up to 15% Poor. 16 - 30% Fair. 31 - 60% Around Fine. Very Fine 75 - 90%. Extremely Fine around 90 - 97% and About Uncirculated (AUNC) between 98 - 99%.

SECTION 1

Treasury Notes 1914 to 1928

The Chancellor of the day, Lloyd George, just a few hours after the midnight Declaration of War, touched on the need to preserve the country's gold. The issue of notes for one pound and for ten shillings were to circulate 'As full as sovereigns and half-sovereigns are current and shall be legal tender in the United Kingdom for the payment of any amount"

The Bank of England felt that large numbers of low-value notes wouldn't be "safe" unless they were printed on special, handmade paper. This meant a relatively slow output. The Chancellor wanted them immediately, so instead, they were produced by the treasury. His announcement in Parliament was on August 5th; Waterlow Brothers and Layton provided the first of the new one pound notes on August 7th! Obviously, there must have been earlier discussions and preparations for such a speedy result. Possibly, a very fine Crystal Ball revealed the inevitability of The Great War.

An astonishing achievement, carried out over a single weekend, saw the printing of a vast number of the new notes. They were printed on ungummed postage stamp paper and carried the G.R. cypher watermark. Bearing the signature of the SECRETARY TO THE TREASURY John Bradbury, the pound notes were printed in black and, appearing just one week later, the ten shilling notes were in red. Both notes were the same size and were printed on only one side of the paper. It was advisable to have all your notes face upwards before counting. Many found face down, it is said, were thrown away as scrap paper! Thomas De La Rue and Company assisted Waterlow Brothers and Layton to produce the ten shilling note. Almost at once, a second series was devised. This time banknote paper was used and a much more elaborate watermark incorporated: the Royal Cypher, value, rose, thistle, shamrock, and daffodil. Still on one side only and in the same colours, some sorting assistance was provided by varying the sizes slightly between the two values. Included in this second series is the issue of: THE DARDANELLES CAMPAIGN Overprints (pages 9 and 13). Third issue "Bradburys", chiefly in brown (£1) and green (10/-) speedily followed, Both sides were printed and the "typical" British banknote was established.

The original purpose of the Treasury note was to gather in the gold. So successful was the exercise that silver was targeted and notes were prepared for five shillings (5/-), half-a-crown (2/6d), and even one shilling (1/-). Fear of runaway inflation through notes unbacked by real assets led to the destruction of most of these.

H.M. TREASURY NOTES
"260 Days"

Under General Sir Ian Hamilton, a force of 30,000 men set sail from Lemnos with the intention of making a landing on the Peninsula of Gallipoli. First ashore, 25th April 1915, were the combined contingents from Australia and New Zealand: the ANZACS. The place of their landing has since been known as Anzac Cove. Getting ashore was relatively easy, but holding the cove in the face of brave and very tough Turkish soldiers, led by Mustafa Kemal (later called Ataturk)
brought out the best in the Anzacs who achieved, probably, the only success in a disastrous campaign.

At the tip of the peninsula was Cape Helles. Cape HELL suffices to pinpoint slaughter on a vast scale. Hour after hour the British infantry scrambled down the gang-planks leading from doors cut in the side of the "River Clyde". Most were killed before they even touched the shore. Red ripples washed on to "V" beach. At "W" beach, the 1st Lancashire Fusiliers won their historic "six Victoria Crosses before breakfast" and established a toe-hold at the cost of half their number.

Fierce counter attacks by the Turks eventually reduced all Allied positions to little more than the space they physically occupied. The great Dardanelles Expedition: which was intended to relieve the static, murderous trench warfare of France, itself became the very worst kind of trench warfare where the opposing sides were so close together that hand grenades were tossed from one to the other, and often back again before exploding. The Turks, by digging their trenches so close to their enemy, avoided being shelled by the British fleet. Attacks by the Allies couldn't push back the Turks; massive counter attacks, with huge casualties, couldn't dislodge the Allies, Gallipoli was a disaster.

On the morning of 20th December, the Turks, at first with nervous suspicion, were astonished to find that the entire Anzac force had gone. On the 9th January, the British forces at Cape Helles also "disappeared" in the same way: stealthily, during the night. Both "withdrawals" were brilliantly carried out without casualties.

SECTION TWO:

BANK OF ENGLAND NOTES 1694 - 1928

There were notes even before the Bank of England came into existence in 1694. Gentlemens' agreements in writing were promises (or promissory notes) to reimburse whoever eventually presented the note:

"Thus a note from A to B promising to pay £20 for some shipment would be used by B to pay C for corn. Then A would pay C instead (of B) the original amount of money':

(From D.M. Miller's "Bank of England and Treasury Notes 1694 - 1970").

D.M. Miller also tells how notes for despatch to London were first cut in half and the two halves sent by separate stage coaches to defeat the highwayman. Provided both consignments survived the coach trip, the notes were re-joined, encashed, and cancelled; the cancellation was reinforced by punching or cutting a hole to prevent re-presentation.

The Bank was particularly upset by attempts to forge its notes. Simply being caught in possession of a forgery meant certain transportation. This was harsh when one considers that some forgers were skilled enough to fool bank cashiers. There were so many prosecutions, however, that jurors ignored even the most damning evidence because the punishment was considered too severe. The Bank later endeavoured to ease the situation by arranging for the convict's family to accompany him, and by ensuring that they had some cash upon arrival.

Knowingly possessing a forged note is still an offence. Sending a suspect note to the bank for verification will result in the issue of a Memorandum of Detention if the note proves to be counterfeit; then it will be destroyed. The Bank might well consider that forgeries of notes that are no longer legal tender offer a lesser threat, but in actual fact, Bank of England notes are actually redeemable at the bank for face value indefinitely.

By 1725 there were notes in the range £20, £30, etc, to £100, £200, £300, £400, £500 and £1,000. Notes for £10, £15 and £25 were issued between 1759 and 1765, but none for under £10. Provincial banks and even tradesmen started issuing notes for any sum: in the extreme for one penny! Notes under £5 were eventually prohibited (except in Scotland), but it was too late. Notes issued without sufficient backing assets leads to bankruptcy. Over 100 banks met this fate, and a further 300 eventually closed.

Prosperity brought about by the efforts to pursue the wars with France caused a massive revival of little banks until their number exceeded 700. When war with France was drawing to a close, all the steam went out of the economy and customers found they needed the substance (gold) rather than the promise (notes). Hundreds of banks collapsed and the situation brought even the Bank of England to its knees.

It was found that many would have survived if they could have called-up their cash reserves in time. To remove that difficulty, the Bank of England opened branches to shorten the lines of communication; Birmingham, Bristol, Exeter, Gloucester, Leeds, Liverpool and Manchester branches were followed by others at Belfast, Cardiff, Hull, Leicester, Newcastle, Norwich, Portsmouth, Southampton and Swansea.

Of the bank notes up to, and including Chief Cashier Horace George Bowen, only Henry Hase notes appear with any frequency. Due to the rarity of the 18th and 19th century notes there is insufficient trading to compile useful averages. Only actual offers, or auction results can provide a true guide to value.

BANK OF ENGLAND NOTES 1694 - 1928

Few notes are known to have survived from the period up to Charles Jewson.

The Chief Cashiers 1694 - 1777:
John Kendrick - 1694
Thomas Speed - 1694 to 1699
Thomas Madockes - 1699 to 1739
James Collier with Daniel Race - 1739 to 1751
Daniel Race with Elias Simes - 1751 to 1759
Daniel Race - 1759 to 1775
Charles Jewson - 1775 to 1777

No.	Date	Signature/face value/details	Fine
		Abraham Newland - 1778 to 1807:	
REB1	1797	£1, note No.2, at auction 1993	£57,000
REB2	1798 - 1801	£1, smaller plate, printed signature	£3500
REB3	1801 - 1803	£1, new watermark, standard size	£2200
REB4	1803 - 1807	£1, value in watermark	£2000

REB9	1805 - 1807	£2, new design	£4000
REB10	1793	£5	£12,000
REB11	1798 - 1801	£10, smaller plate, printed signature	£20,000
REB12	1805 - 1807	£10, Bank of England heading	£20,000
REB13		£15	-
REB14		£20	-
REB15		£100, at auction 2000 (AVF)	£40,250
		Henry Hase - 1807 to 1829:	
REB31		£1, hand written date, countersigned	£4000
REB32		£1, hand written date, not countersigned	£3000
REB33		£1, printed date and serials	£1400
REB34		£1, emergency issue, dated 1821	£1400
REB35		£2, hand written date, countersigned	£4250
REB36		£2, hand written date, not countersigned	£4000
REB37		£2, printed date and serials	£3000
REB38		£5, hand written	£7000
REB39		£5, printed date and serials	£6000
REB39T		£5, Trial Hase printed in France, at auction 2000	£1200

Hase notes were also issued in £10, £15, £20, £25, £30, £40, £50, £100, £200, £300, £500 and £1000 denominations. Very few examples are in private hands. Notes from Bank of England branches other than London were also issued, but, again, are very rare.

BANK OF ENGLAND NOTES 1694 - 1928

No.	Signature/face value/details	Fine
	Thomas Rippon 1829 - 1835:	
REB61	£5	£10,000
REB62	£10	£18,000
	See note under Matthew Marshall section, below.	
	Matthew Marshall 1835 - 1864:	
REB91	£5, hand written signature	£5000
REB92	£5, printed signature	£5000
REB93	£5, signature in watermark	£5000
REB94	£10, hand written signature	£10,000
REB95	£10, printed signature	£10,000
REB96	£10, signature in watermark	£10,000

Marshall and Rippon notes were also issued in £20, £30, £40, £50, £100, £200, £300, £500 and £1000 denominations. Very few examples are in private hands. Notes from Bank of England branches other than London were also issued, but, again, are very rare.

William Miller 1864 - 1866:
(none bear his signature, and the notes are instead signed by the bank officials: W. P. Gattie, T. Kent or C. T. Whitmel)

REB111	£5, hand written signature	£8000

During Miller's time as chief cashier notes were also issued in £10, £20, £50, £100, £200, £300, £500 and £1000 denominations. None are known in private hands. Notes from Bank of England branches other than London were also issued, but, again, none are known in private hands.

George Forbes 1866 - 1873:
(Early notes were signed by a bank official and can only be identified as a Forbes by the date)

REB121	£5, signed by a member of his staff	£4000
REB122	£5, printed 'Geo Forbes' signature	£10,000
REB123	£10, signed by a member of his staff	-
REB124	£10, printed 'Geo Forbes' signature	-
REB124	£10, as above. VF at auction 2003: £7,000	

Forbes' notes were also issued in £20, £50, £100, £200, £300, £500 and £1000 denominations. None are known in private hands. Notes from Bank of England branches other than London were also issued, but, again, none are known in private hands.

	£5, Liverpool			£850
	£5, Manchester 1920		£500	£900
	£5, Newcastle 1919		£900	£1400
	£5, Plymouth 1925		UNC: £2500	
REBS171	£5, Specimen 01/Q 0000 (Duggleby 7th Edition)		£3500	
REB172	£10, London 1918 - 1922			£650
	£10, London 1923 - 1925			£650
REB173	£20	£600	£1100	£2400
REB174	£50, Manchester	£900	£1500	
REB175	£100	£900	£1200	£2500
REB176	£200			£15,000
REB177	£500			£17,000
REB178	£1000, very rare			

Early Bank of England notes are found to have one straight cut edge and three untrimmed, or 'torn' edges. The fact they were printed in pairs means that half of them have a left cut edge, whilst the other half have a right cut edge.

BANK OF ENGLAND NOTES from 1928

The Modern Series

In November 1928, under the *Currency and Banknote act* of that year, the Bank of England assumed all responsibility for issuing bank notes. On the 22nd November 1928 the 'Series A' green One Pound notes and red/brown Ten Shilling notes were introduced to circulate with the existing higher denomination white notes (the production of which had not ben affected by the Treasury taking the roll of printing the lower denomination notes). In July 1933 the last of the 10 Shilling and One Pound Treasury notes were withdrawn from circulation.

There was serious intention to replace the silver coins in circulation with notes to the value of One Shilling, Two Shillings, and Five Shillings. The designs for each note were to be identical, front and back, without watermark and not numbered. A thread however, was to be incorporated.

The One Shilling, Two Shilling and Five Shilling notes were not taken beyond the proof stage. Notes for Two Shillings and Sixpence (Half a Crown) and for Five Shillings (a Crown) were produced in large numbers and distributed to a number of banks just in case.

None were put into circulation and they were all recalled to be pulped. However, some of the Half Crown and Crown notes did escape, and are very rare.

BANK OF ENGLAND NOTES from 1928

One Pound - Britannia type (continued)

The Guernsey Overprint

When the Germans occupied the Channel Islands in WWII almost all the British Channel Island currency was hoarded by the inhabitants. Small change was short, so the Germans gave permission for the islanders to issue small denominations of their own to the total value of £5,000. To prevent potential damage to the economy, this was done subject to the withdrawal and handing over of £5,000 worth of English bank notes to the Germans. After the first £5,000, the islanders were still short of change, so, again, £5,000 of notes were withdrawn and handed to the Germans, and another £5,000 worth of small change was made for use on the island. The notes handed over were old notes that were due to be destroyed, and on both ocassions they were stamped '**Withdrawn from circulation**' with either the date: September 18th 1941, or November 10th 1941.

Please note that the Guernsey overprint section has been re-organised, and the reference numbers changed to incorporate a 'G' for Guernsey for easy identification. The two digits in the reference number refer to the note type that was overprinted.

No.	Start date	Signature/face value/details	Fine	VF	EF	AUNC
		Guernsey Overprints dated 18 September:				
RBG31a	**Mahon**	A- - to H- - (48 only)		£460	£920	
RBG33a	**Catterns**	H- - to Z- - (74 only)		£410	£720	
RBG34a	**Catterns**	- -A (5 only)		£2200		
RBG36a	**Peppiatt**	- -B to - -Z (328 only)		£370	£620	
RBG37a	**Peppiatt**	A- -A to L- -A (1,898)		£170	£360	£480
RBG41a	**Peppiatt**	A- -D (35 only) Blue type		£420	£720	
RBG42a	**Peppiatt**	C- -D (85 only) Blue type			£720	
		Guernsey Overprints dated 10 November:				
RBG37b	**Peppiatt**	E03A (79 only)		£390	£660	
RBG37c	**Peppiatt**	E15A (398 only)	£125	£250	£450	

The suffixes on the reference numbers above refer to the full stop after the overprint:
a: Has full stop after the '1941' on the front only.
b: Has full stop after the '1941' on front and back.
c: Has full stop after the '1941' on the back only

BANK OF ENGLAND NOTES from 1928

The replication of Series D and E Bank of England Bank Notes

The Bank of England have given written consent for Rotographic to reproduce its bank notes within this book. To meet the requirements of the Bank of England, with regard to the Series D and Series E notes (covering notes issued between 1971 to date), the word 'SPECIMEN' must appear twice on each note, diagonally, in specified places. So please bear in mind that the notes are not Specimen notes unless referred to as such in the text.

One Pound - The Queen / Isaac Newton

BANK OF ENGLAND NOTES from 1928

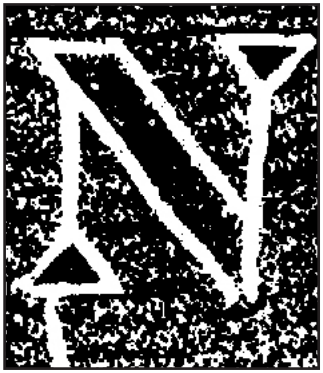
Operation Bernhard - The Nazi White Fivers

In an attempt to damage the British economy, the Nazis forged White Fivers in large numbers. They made one quite noticable 'improvement' to the British watermark, possibly so that they could accurately detect their own forgeries, particularly the top quality ones. Or, perhaps it was a cunning anti Nazi act by the team who laid the wires in the watermarking process. Or, perhaps even nothing more than a slight error. It is the one proven indicator which distinguishes the forgery from the genuine.

The white/clear line in the watermark of the counterfeit notes points to the centre of the triangular serif at the foot of the first 'N' of 'ENGLAND'. In genuine notes the line is off centre and more to the left of the serif when viewed the right way round. In the close-ups below, the 'N' has been magnified and intensified.

Counterfeit Note



Genuine Note

In Issue No.1, Volume 31, of the IBNS Journal there is an article by Lance K. Campbell in which he states quite adamantly that there were no Operation Bernhard (Nazi Forgery) notes for the denominations of £100, £500 or £1000. As always, however, there were other forgers at work. Identifying a forgery does not automatically prove it to be a 'Bernhard' example. The numbers used by the Nazis for the forged £5 notes were as follows:

A/128 to A/175 - A/281 to A/314 - A/317 to A/398
B/105 to B/131 - B/134 to B/182 - B/186 to B/237 - B/256 to B/279
J/373 to J/377

BANK OF ENGLAND NOTES from 1928

Five Pounds - Helmeted Britannia / Lion and Key

Series B - Blue/Green/Orange - 160 x 90mm - 6 $^{5}/_{16}$ x 3 $^{9}/_{16}$ in

The Bank had decided to replace the Series A notes as far back as 1931, but various reasons, including WWII, the Chief Cashier (Beale at that time) not being too struck on the designs, and not to mention a minor disagreement with the designer, delayed their issue. Eventually, in 1957 the only Series B note was issued, being the £5 helmeted Britannia type.

The two £5 symbols to the left show the difference between notes RB109 and RB110.

RB109

RB109 Reverse- Common to RB110 with the exception of the slightly different £5 symbols.

BANK OF ENGLAND NOTES from 1928 - Cypher Notes

Notes with special serial numbers, to mark important occasions.

In a similar fashion to what the Royal Mint and Royal Mail have been doing for some time, in 1988 new opportunities were seen for the exploitation of Bank notes aimed at collectors (or people wanting to buy a gift for a collector!) in order to generate more profit.

In 1990 the first presentation packs were issued containing the 'last' series D and 'first' series E notes with matching serial numbers. At first this venture wasn't very well organised. Prices of the special notes became over inflated and some collectors and dealers were displeased about the way the notes were distributed.

In 1996 special notes started to be issued to mark important occasions, the first being the Queens 70th Birthday. The values of many of these notes now may not be as high as the original issue prices. As with similar 'commemorative' items (often for pretty obscure things!) from the Royal Mint and the Royal Mail, the secondary market is generally much quieter than the market for such items when they are new. This is partly because most of the people that want such items get them when they are new and then keep them. Therefore there are far fewer people looking for them 'second hand'. The fact that some of these special serial number issues were sometimes presented with coins from the Royal Mint, and stamps from the Royal Mail, tends not to affect their desirability.

Five Pounds - The Queen / George Stephenson

Series E - Mainly Green - 135 x 70mm - $5\ {}^{5}/_{16}$ x $2\ {}^{3}/_{4}$ in

G. E. A. Kentfield (1991 - 1998):

Larger Denominations

In the past larger denomination notes have been produced, but none that were intended for circulation. Notable are the Fifteen Thousand Pound notes that were issued to British Airmen in the 1991 Gulf War. The sum was paid to the airmen on return. Very large denomination notes are also made by the Bank of England and issued to the note issuing banks of Scotland and Northern Ireland, so that the notes they circulate are always supported by the same amount in Bank of England sterling currency.

Appendix I. Comparative Catalogue Numbers for Treasury Notes

A Comparison table of the reference numbers in this book, and the two other most popular references for English banknotes.

CBN = This book, "Collectors' Bank Notes".
Duggleby = "English Paper Money" by V. Duggleby (7th edition used).
Pick = The "Standard Catalog of World Paper Money", originally by Albert Pick (The 10th edition (Vol. 2) and 9th edition (Vol. 3) were referred to).

Advertisement (Rotographic CBN2008)

The International Bank Note Society (IBNS) was formed in 1961 as a non-profit organization. The IBNS is organized for educational purposes and in furtherance of such purpose, its objectives are to promote, stimulate and advance the study and knowledge of world wide banknotes and paper currencies. Currently the IBNS has more than 2,000 members in over 90 countries.

Members can enjoy a number of benefits, for example: a quality journal and newsletter containing information on new issues, learned studies on paper money, and a worthwhile list of contacts and dealers to further their collections and studies.

To join the International Bank Note Society please make a photocopy of this page (or write a letter with the required details as outlined below) and send it to the society's General Secretary Clive Rice who will also be pleased to answer any questions you may wish to ask. His contact details are shown below. This form is also available for download in the Collectors Banknote section on www.rotographic.co.uk

Name: (as you wish it to appear on your membership card)

Telephone Number: (Include country code if outside the UK)

Address:

Email address:

Type of membership required (fees payable annually)**:**

☐ **Individual Membership** (£16.50 / US$33.00 / EUR25.00)
☐ **Junior Membership** (£8.25 / US$16.50 / EUR10.00)
☐ **Family Membership** (£20.50 / US$41.00 / EUR30.00)
☐ **Further details only please**

GB£ and US$ may be sent as a cheque or money order payable to I.B.N.S. The General Secretary is also able to accept most other currencies if prior contact is made. The web-site of the IBNS is www.theIBNS.org

Please Post to the General Secretary:

Mr Clive Rice,
25 Copse Side, Binscombe,
Godalming, Surrey, GU7 3RU, (ENGLAND)

The General Secretary can also be contaced via email: IBNSuk@onetel.com_
